MEZ BREEZE

HUMAN READABLE MESSAGES

[MEZANGELLE 2003 - 2011]

TRAUMAWIEN

"Mez does for code poetry as jodi and Vuk Cosic have done for ASCII Art: Turning a great, but naively executed concept into something brilliant, paving the ground for a whole generation of digital artists." (Florian Cramer).

The impact of her unique codewurks [constructed via her pioneering net.language "mezangelle"] has been equated with the work of Shakespeare, James Joyce, Emily Dickinson, and Larry Wall. Mez has exhibited extensively since the early 90s [eg *Wollongong World Women Online 1995*, *ISEA Chicago + ARS Electronica 1997*, *The Metropolitan Museum Tokyo 1999*, *SIGGRAPH 1999 & 2000*, *_Under_Score_ @The Brooklyn Academy of Music 2001*, *+playengines+ Melbourne Australia 2003*, *p0es1s Berlin 2004*, *Dissention Convention @Postmaster Gallery New York 2004*, *Arte Nuevo Interactiva Mexico 2005*, *Radical Software @Turin Italy 2006*, *DIWO @ The HTTP Gallery London 2007*, *New Media Scotland 2008*, *the Laguna Art Museum California and Alternator Gallery Canada 2009*, *Federation Square Melbourne 2010* and *Transmediale Berlin 2011*].

Her awards include the **2001 VIF Prize** [Germany], the **JavaMuseum Artist Of The Year 2001** [Germany], **2002 Newcastle New Media Poetry Prize** [Australia], winner of the **2006 Site Specific Index Page Competition** [Italy] and **Burton Wonderland Gallery Winner 2010** [judged by Tim Burton, Australia]. Mez was a **Vilém Flusser Theory Award 2011** nominee for her article set '*_Social Tesseracting_*' and is the Executive Editor of the "*_Augmentology 1[L]0[L]1_*" project, a Synthetic Ecology Strategist, Consultant and Game Theorist.

Chapter 1

2003

1.1 June

1.1.1][[frag.ment]] (2003-06-10 09:55)

3. WHAT ARE YOU LISTENING TO RIGHT NOW? turin brakes "The Optimist LP"

4. WHAT ARE THE LAST 4 DIGITS OF YOUR PHONE NUMBER? 3690

33. LIVING ARRANGEMENTS? yes please. some1 please arrange my life 4 me.

34. WHAT BOOKS ARE YOU READING? 1 book. "supercannes" by jg ballard

40. WHAT INSPIRES YOU? uber-newness. gaps and swells in conversations. contradictions [especially in ppl]. dedication. oddness. talent. passion. focus. fragments.

50. LIFETIME GOALS? 2 express + create without becoming hackneyed or wanky. 2 make as many reliable friendships as possible. 2 connect with genuine ppl with talent, drive, motivation + compassion [with a l'tle bit o' cheekiness + stupid humour thrown in]. 2 inspire and assist those who want 2 do but r afraid 2 try.

(2003-06-11 01:08:04)

Hola Mez, Amy here. God you inspire me. :)

netwurker (2003-06-11 05:48:34)

thinks:)

1.1.2 papazine n_terview][1][(2003-06-10 10:08)

A:

in general, before attempting to create a more "multimedia" oriented work [ie like the final incarnation of _][ad][Dressed in a Skin C.ode _] i always create smaller, more net-directed pieces which i term either net.wurks or code.works. these largely text/code based pieces are constructed using the hybrid code/poetic dynamic [language] entitled mezangelle which is constructed via a mixture of code splicing [ie fragments of programming language-shards - mostly Perl - + operating system & email formats, tree/directory-structures + wildcard references, booleanisms, unix shell commands, html + java script conventions and ascii] and parsed poetic language including repeated allusions 2 hyperlinks via bracketing of meanings and word splicing. i also employ various identity tags [avatarish indicators that appear in the from: fields] that signify a substantial change in the informational/data flow, and can be utilized by a reader/absorber as a way of dealing with the meaning loadings involved in any given wurk-phase....

1.1.3 papa.mag N_terview][2][(2003-06-10 10:09)

...the wurks are then sent to multiple arts email lists, and then modified by fellow collaborators or translated into "normal" english and modified/content altered again, resent etc. i'll begin 2 build a more synergistic [multimedia] work from these texts with an initial subject/concept which may spring from lines of text/code that are generated progressively as a piece percolates.... _][ad][Dressed in a Skin C.ode _ comes from this type of process...making notes in separate email-editor files or using my mobile, depending where i'm at [i don't have a lap/palmtop at the mo so i find myself using my mobile to take down idea snippets]...then the structure usually emerges from these fragments, via a method of appropriation [eg mimicking of a international relay chat transcript or actually using 1 that i may have participated in, or utilizing a stretch of stylistically (or executably)-breathtaking code that i may have been using programmatically or come across in my research].....i then rework these net/code.wurks via a format suitable for the web using a txt editor and some bare html code if need be.....

1.1.4 zineish bits][3][(2003-06-10 10:12)

in the case of `][ad][Dressed in a Skin C.ode _`, i used these net + code.wurks as a basis to create a web-based work that uses these net.wurks [ie `_texts _`] as source material as well as the actual processes/methods involved in their dispersion [which explains the format of each `_text _` as a email, including footers, subject lines, from:, re: and to: fields etc].i used flash MX 2 create the more dynamic components, such as the `_n.hanced _` wurks that use mouseovers, clickable regions, audio fragments & "click- &-hold" areas - ie so-termed "interactive" [blergh - mebbe co-operative is a better term?] sections that play against themselves in terms of functionality in order to make the audience play and weave within the meaning loadings. nothing is easy 2 "get" in a mez wurk:) the purpose of manipulating interactive functions via these "flashifications" is 2 hilight the stagnant methods `_some _` [not all] people employ when using prepackaged plugin-tools without any 4thought as 2 their limitations/construction/cultural bifurcations. i use a nifty program called `_Soundraider _` that scans ur harddrive for `.wav` files and then manipulates these into a type of personalised computer soundtrack with 5 audio layers that can be locked, muted or shuffled to create audio that is highly unpredictable but also controllable via the `.wav` file structure you feed it2 it [it can also scan specific directories alone]. i record this output then select appropriate sections to integrate.

1.1.5 blurb][4][(2003-06-10 10:13)

i produce & translate the mezangelled texts in2 a variety of levels including multimediac versions as each layering is coded and specialised within their own peculiar meaning/interfaced trajectories.....this increases the expressive avenues via which people can then choose 2 input their own personal cues whilst viewing/exploring the wurk and enhance their comprehension levels, especially if audience members aren't in the mezangelle loop...i tried to weight `][ad][Dressed in a Skin C.ode _` towards a more accessible meaning wavelength, and hopefully it has enuff conventional multimedia elements to entertain those not textcentric or code literate.....this process of extending intitial net/code.wurks into more multimediac territory can have mixed results, and i'm not essentially sure that `][ad][Dressed in a Skin C.ode _` succeeds in terms of adequately reflecting the whole network mechanism that underpins it, even though it does reference it repeatedly. the more multimediac interface does allow for multiple interpretive pathways via which an absorber can choose to extract meaning via more sensory cues.

biti (2003-06-09 20:52:54) breathing skin, coming in gasps
the medium of livejournal lends itself to this... i feel a sparking, and a synergy
here. here is a new medium, and new type of dynamic. less linear. more in gasps
and gaps.

(2003-06-09 21:55:05) Re: breathing skin, coming in gasps
More shifting against itself, always a skin rubbing raw and meandering into love
and abrasion. - Alan Sondheim sonenheim@panix.com

1.4.3 `_Sub.Mission[s]_` (2003-09-22 21:48)

`_Submission Details:` `_` Good thematic without being too obvious. The fact that they are open to realistic hybrid-collaboration is good. Very competent cvs and professionalism evident. Would work well with a more experimentally-directed collaboration set.

`_Support Material:` `_`

i) Audio [xxxxxxx]: well-paced and innovative but slightly formulaic in terms of soundtracksesqueness. Might be a problem when seeking to pair with a writer/txtter than uses other benchmarks in terms of actual xxxxx construction.

ii) Video [xxxxxxx]: production stills illustrate competent visual referencing and potential for image creation. Video constructions are filmic in intent and slickly produced [high production values evident] but possibly too polished [rigid] for xxxxx unless paired with appropriate collaborator.

RATINGS:

- ARTISTIC VALUE OF CONCEPT: 7/10

- POTENTIAL FOR ARTISTIC REALISATION: 8/10

- VALUE OF EXPERIENCE/INTERPRETED CAPACITY TO COMPLETE PROJECT: 9.5/10

–
_Submission Details: – CV slightly sketchy due to the early stage of careers. Submission concept more digitally inclined which is promising, but overall limited strength of submission direction.

_Support Material: –

i) Videos: good integration of digital affects, less centred on filmic conventions. Nice reworking of video material.

ii) Text: Less strong in terms of supporting submission.

RATINGS:

- ARTISTIC VALUE OF CONCEPT: 6.5/10

- POTENTIAL FOR ARTISTIC REALISATION: 7/10

- VALUE OF EXPERIENCE/INTERPRETED CAPACITY TO COMPLETE PROJECT: 8/10

–
_Submission Details: – Extremely integrated collaborative team is evident thru proposal. Such employment of heavy mono-directed themes [eg cvs and conceptual nature of submission] seems not as relevant towards xxxxxx aims + emphasis on 2-fold narrative process less than applicable to xxxxxx in terms of the quality of other, more appropriate applicants.

_Support Material: –

i) Audio: xxxxx : ethereal + performative in nature.

xxxxxx: experimental, interesting. focus less on fractured soundscapes + more on directed audio.

ii) Text [various]: Good level of writing skills but again, more focused on traditional execution than seems relevant to here.

RATINGS:

- ARTISTIC VALUE OF CONCEPT: 6/10

- POTENTIAL FOR ARTISTIC REALISATION: 6/10

- VALUE OF EXPERIENCE/INTERPRETED CAPACITY TO COMPLETE PROJECT: 7/10

–

_Submission Details: – Very traditional in expressive orientation and collaborative structuring [ie sticking to defined fields of expertise]. Not overtly relevant or appropriate to xxxxxxxx.

_Support Material: –

ii) Text [script + poetry + fiction]: Again, too heavily boxed in terms of acceptable methods of creative output.

RATINGS:

- ARTISTIC VALUE OF CONCEPT: 4/10
- POTENTIAL FOR ARTISTIC REALISATION: 5/10
- VALUE OF EXPERIENCE/INTERPRETED CAPACITY TO COMPLETE PROJECT: 6/10

–

_Submission Details: – Brings interesting background to this project [ie science oriented] but not totally appropriate in terms of cv or support material.

RATINGS:

- ARTISTIC VALUE OF CONCEPT: 6/10
- POTENTIAL FOR ARTISTIC REALISATION: 6/10
- VALUE OF EXPERIENCE/INTERPRETED CAPACITY TO COMPLETE PROJECT: 5/10

–

_Submission Details: – Excellent concept/proposal.

RATINGS:

- ARTISTIC VALUE OF CONCEPT: 8/10
- POTENTIAL FOR ARTISTIC REALISATION: 8/10
- VALUE OF EXPERIENCE/INTERPRETED CAPACITY TO COM-

PLETE PROJECT: 9/10

–

_Submission Details: _ Nice open-ended ambiguity in terms of expectations and creative control in regards to project. Could work well if paired with graffiti oriented artist[s].

_Support Material: _

i) Text: Straight poetry that reads as hip-hop [lyrically].

RATINGS:

- ARTISTIC VALUE OF CONCEPT: 6/10

- POTENTIAL FOR ARTISTIC REALISATION: 6/10

- VALUE OF EXPERIENCE/INTERPRETED CAPACITY TO COMPLETE PROJECT: 8/10

–

_Submission Details: _

_Support Material: _

i) Audio:

ii) Text:

RATINGS:

- ARTISTIC VALUE OF CONCEPT: 6/10

- POTENTIAL FOR ARTISTIC REALISATION: 6/10

- VALUE OF EXPERIENCE/INTERPRETED CAPACITY TO COMPLETE PROJECT: 7/10

2.1.3 old discu[rsive]ssion (2004-01-09 13:18)

Date: Fri, 09 Jan 2004 13:14:31 +1100
To: sxx sxxx sxxxx
From: "[mez]"
Subject: Re: old discu[rsive]ssion + portents of history

At 08:15 PM 8/01/2004, xxx wrote:

■

What I am beginning to sense from some participating in this on-line discussion is a subtle posture of covert defensiveness in regard to the construction (if necessary at all) of this term: New Media.

■

hiya xxx + all.

i agree with this... i've also been a trifle unezy with the way certain threads have tended to focus on _" _ new media _/" _ as an over-arching n.clusive field [despite the attempts 2 offer partially disjunctive definitions]. i have, howeva, only had the time 2 briefly scan certain topics so mebbe have missed much....i must admit 2 being more n.terested in the current breakdown thread in terms of influences that is now just occurring....

i guess i somewot resign myself to the perpetual communication ethic that is displayed + ratified via email discussions like these, that tend 2 have an almost n.built tendency to derail the potential for expanding [+ hence end up stained with reductionististic overcasts] any presentation of genre _structures thru the need 2

- a) m.bed them in[2] a historical framework/grounding, no matter how loosely d.fined +
- b) draw threads 2wards analytical reasoning rather than n.courage communication methods|[fractures that r utilised by the medium itself [echos of print-based culture, any1?;)].....

ie
 [d|n.duction via m.plied confliction/competition of sub(e)jective dia-as opposed 2 multi-logue connexion(s)]
 [m.ploy covertly _engineered friction minus the screech of troll-baiting + then mask the conflict rub as theorised learning curves]
 [non _spiral data adoption + edge 2wards genre-formulations thru the predicated rather than anomalous media x.tensions].

cheers,
 mez

2.3.3 God_mimi.Cry_[IRC x.tracting] (2004-03-09 18:23)

- cloning.failure.rates +validity of essentially harvesting siblings via a designer process in order to combat genetic diseases
- screening.may b.acceptable +but actively engineering a child to provide bone marrow that will save another child =harvesting
- very Brave.New.Worldish.

- + discarded.embryos [effectively "screened" + "terminated" +2 get that specific.dna.clot]
- + dark.figure.cloning -thousands of faux.mutated animals [and probably humans] used in order 2 produce "successes".

-----disrupting the very fabric of functional } evolution.

- how.du.u.class deformity? +how r we to know that that very "deformity" isn't evolution on a projected scale?
- mutation.is.evolution's.[m]arrow. +should we play[@] g.od[dezza] +actively select who falls into that normalisation category and who doesn't??

<][mez][> no
<][mez][> we won't.

-----we.need.2.keep.a.lid on
+hyperacceleration of these so called genetic fixes that

+
may effect [xxxx's] progression in terms of attempting 2

-----quantum.leap ^up^ the phylo-
genetic scale.

(vaccinations) = a social necessity
if(then) = raising ur child as part of a mainstream westernised community
= chemical buildup/antibody reactive base
= [add.ON engineering]

<][xxxx][> ..but at least its within the parameters of an enclosed system [if u believe current scientific theory that is]
<][xxxx][> nature [as in ecosystem-based] is contained, and part of that is struggle for survival and reproduction, yus?
<][xxxxx][> eros and thantos
<][xxxx][> self-replicating [and NOT individualisation] is necessary to that system

[housing.of.the.concept.of.evolution]

<][xxxx][> ..so i guess its playing mini-god, or god _mimickry, within parameters that allow for it, especially in terms of a more naturalised perspective.

<[xxxxxxx]> of course as humans we are so species _centric and overpopulate beyond the boom/bust cycle of resource usage [ie lemmings-style cycle of overpopulate then actively self-cull] that we fuck this delicate balance up

<[xxxxx]> we hyperaccelerate beyond the parameters defined by the strict concept of evolution.

<[xxxx]> ..but _beyond _ the accepted pattern of functional species adaptation....

<[xxxxx]> the whole point of this discussion re: genetic modification is that nothing exists in isolation

<[xxxxx]> isolation, even

<[xxxx]> that the whole spectrum of altering *1* organisms genetic behaviour [culturally decreed as well as biologically] will effect all.

[pinprick _evolution]

2.3.10 Guilt in Gilt-Skin: Pointer Decay [vs: Decoy] (2004-03-17 22:43)

[A 4Dimensional dedication goes here]

Read this and do not code: "wracking memories tracked and cauterized. wildfiring whilst caught in slow-leakage motion"
Study this and do not parse: "rage stories looped and hiding while goats blink and leyline stamp"
Scan this and do not flood: "shuffling in insectile heat. bite marking and echo milking [within ghost figure-lures]"

Shallow copy of a pointer: c*licking between a lone wolfed self and shelled Oneness
Addressing the operator: shuttering clay & silicon (quartz teathed) chips and wool swathes in earth claimed decay
The destruction of a dynamic: deletion of blink rates and retrieval reminders

.....his neck with lush skin definers in connection decay vs gene engineered [de]coyness

.....blowing apocalyptic epoxy [xy-ing] or callous eucalyptic

.....hoof harmonics and swarmline flocking in my head/heart

.....silence boundaried and silken-gilt memory flecks vs guilt crowding

.....paw and pore lust drinkage[s]

.....[i sense and dread you with forced affective amnesia]

.....tenderness welts and cognitive cloudings

Shift and static bind: your stories in my emotive gut

Run time and stare: in dear intensity

Touch and dynamic bind: thunderbeating logic meets smelted vs smelling stillness

..

2.4.5 **_post-modernist mental health revisions_ (2004-04-21 14:37)**

20:24][...pondering the idea of post-modernist mental health revisions ie that
some types of so called abnormal or even psychopathological states may ac-
tually be an adaptive reaction to the human cultural condition [that is, from
a westernised perspective]

20:25][...states like schizophrenia, maybe even borderline personality types.....

20:25][..but haven't really made any firm theoretical conclusions regarding

it....

20:35][on the way there we were just interacting as we normally do, which is in part a type of play-oriented behaviour

20:36][after a bit he also started to display a type of play-gearred behaviour

20:37][it may be a kind of behavioural groundwork for the curiosity orientation that also often accompanies these type of patterns

20:37][[ie much questioning and observing along a non-traditional axis]

20:38][...but that its also very alientating, and could be perceived as straight out immaturity by regular socially adapted "adults"

20:39][....certain nerdy or geek traits often correspond 2 extrememly high lvls of intelligence but also a high incidence of alienation and/or isolation

20:44][..+ i guess it just reinforced that these so called pathologies may indeed be extremely reasonable manifestations of adaptive patterns in relation to the demands institutionalised life places on us and that this type of functioning may make perfect sense if terms of post-21C westernised disassociative life patterning

20:44][if=in

20:48][absolutely

20:49][i also think that it may b a type of media-inducment in terms of schizoid personas; that the linear method of existence is slowly being eroded by various cultural standards

20:49][[not a bad thing, really]

20:50][...but we can't really replace it with a system that adequately reflects these behaviours

20:50][okie

20:51][the way we r encouraged 2 exist [ie orient ourselves and our personalities] is as individuals with self-ownership and stable identities

20:51][[ie consistent traits that correspond 2 expectations that r largely predicatable and hence consistent]

20:51][this is how ego-formation occurs

20:52][BUT

20:53][in an environment that now encourages fracturing, splintering of this ego via post-modern de[in]struction of that ego [ie via rapid and effective removal of community ethos, of nuclear family-type responsibilities, of any cohesive sense of altruism or responsibility in relation 2 our ecosystem or even our own species]...

20:54][..it seems almost normal that patterns of behaviour that favour this new type of alienated/isolated/compeditive existence

20:55][.will increasingly manifest on a cultural spectrum....

20:55][[such as aspergers, or even bi-polar disorders that show a fracturing

in emotional/intellectual states prized by any corporate mindset]...
20:56][i think that the rush of the information age has somewhat exacerbated
this.

20:57][.without adequate acceptance/understanding as to how this would
effect individual mental functioning

20:59][a "community" may in itself embody an outmoded set of cultural
expectations

21:00][but its not nec a *regression* but an adaptive sequence ie cultural
evolution

21:01][but i'm not just trying to ascertain a cause, but to indicate that the
whole method of trying to quantify/box these behaviours may be wrong

21:02][...that they may be highly *adaptive* sets of behaviours [genetically
triggered or otherwise]

21:02][.rather than *maladaptive*

21:03][.and that we haven't [essentially] caught up in terms of realigning our
cultural expectations to incorporate this

2.6.16 `_e.bon[ic]y_` (2004-06-22 23:14)

walking thru the park i spied a HUGE healthy/vibrant pine tree that had escaped my eye previously
i walked up 2 it and put my hand out 2 it. @ 1st it/i resisted any energy exchanging, but then we had a nice symbiotic flow 4 a bit.
then as i was walking away i kept looking back at it...

..then as i turned around for the last time i spotted a dead currawong directly in front of me on the path i had chosen 2 go to work....
it was splayed out on its front, a young 1 that may have starved 2 death its the 3rd dead currawong i've seen since sunday [a set of bad omens].

then i looked up to see the fog-drenched trees from a previous obs all sweeping in fantastic fractal growth patterns....

when walking down 2 get the tickets yesterday i saw [in the hazy distance] a black irregular shape moving quickly in my direction....
was a boy on a bike all dressed in black with a black hood of his jacket up over his head...

4 some reason i just enfolded this into a vision of a set of colliding particles, almost like mitosis or black hole-edging...
very deep and ebony and intense....

should i edit?

[18:22] <[mez]> [ie make it all manageable, clinical, serene?]

[18:23] <[mez]> turn of the affectivity tap?

[18:23] <[mez]> i can't get 2 natural.
[18:23] <[mez]> everything is slightly fuguish.
[18:23] <[mez]> generally, i'm feeling a tremendous urge 2 escape.
[18:24] <[mez]> it seems as if the world is slightly glossed with a coat of grey.
[18:25] <[mez]> as i walk my routine sticks in my consciousness throat.
[18:25] <[mez]> i'm edging 2wards a plummeting or soaring momentum.
[18:25] <[mez]> in short, lost in feeling.
[18:25] <[mez]> L>I>F
[18:26] <[mez]> .thats about it.

[18:29] <[mez]> it feels as if that grey coating is hiding something
[18:29] <[mez]> ...the plummet or soaring indicates change, of some type.
[18:30] <[mez]> not sure where, or how.
[18:30] <[mez]> it might b all isolated 2 internal states?
[18:30] <[mez]> i just don't know.
[18:30] <[mez]> work felt like it was killing me, 2day.
[18:30] <[mez]> killing me..+ momentum...+ appreciation.
[18:31] <[mez]> but its all welling up now
[18:31] <[mez]> [as in feeling not isolated 2 victim rhetoric, like 2day at work]

[18:31] <[mez]> feeling much freer. much more able to flow within it.
[18:32] <[mez]> less likely to stitch myself with [stereo]typing
[18:32] <[mez]> able to asses whilst creating
[18:32] <[mez]> [like now]
[18:32] <[mez]> survive + adapt.
[18:32] <[mez]> [and mostly, feel].

[18:34] <[mez]> just don't want 2 shortcut by condensing all this feeling into empty word shells
[18:35] <[mez]> of course..always, in some capacity.

[18:36] <[mez]> "i think i might have been losing that underneath the world"
[18:36] <[mez]> thats beautiful, in isolation.

[18:37] <[mez]> no preempt[y]ing
[18:37] <[mez]> woteva, whenever.
[18:37] <[mez]> i need to sleep + dream violent dreams of action i suspect.
[18:38] <[mez]> [mite counteract the fugue]

[18:40] <[mez]> just caught up here, stretched thru limbic systemics
+ swollen with affective dust

2.8.4 Fwd: [-empyre-] Re; [empyre] nettime and alan, mez, nn (2004-08-18 07:28)

X-Original-To: xx[blahworthy]xx@.edu.au
Delivered-To: xx[blahworthy]xx@.edu.au
Date: Tue, 17 Aug 2004 07:56:42 +1000

At 03:48 PM 16/08/2004, xxcxxss wrote:

■
xxxxxxxxxhave apparently decided that since their posts are no longer
being published on nettimexx-
xxxxxraised
on other lists

■

hi xxcxxss.

1stly, i'd like 2 say this response from alan has been in direct relation
also

2 a moderator intervention that i've been experiencing on xx[blahworthy]xx
lately

[amazing wot happens in the undercurrents and flows of mailing list forums!:]

+ as a co-moderator of this list i expect you have some knowledge of this [i
have asked xxxxx 2 4ward on the correspondence 2 all moderators. please
let me kno if this has been done - if not i have logged a copy here:

<http://www.hotkey.net.au/netwurker/>].

i have also asked 4 a direction in regards 2 my subsequent xxxxxxxxxxxxxxx responses/replies in light of this so as 2 not n.flame the issue further [which i have yet 2 receive] which is y i haven't actually responded *at all* 2 xxxxxxx reply 2 the moderated email [2 which she replied 2 on-list without my awareness].

xxcxxxx, i'm also cognisant of your personal opinion in regards 2 me + my work.

i'm sure u're aware of the issues 2 which i'm referring + i would prefer not 2 raise this in a public forum, as i'm unkeen to n.courage flames or threads that -4 me- fall into a negative, unproductive power dynamic|[n.voking category

that may not benefit the subscribers of xxxxx [IMHO] or n.courage any productive examination of the issues that u seem keen to discuss revolving around this?

if, on the other hand, u see some positive discussion arising from this, then please, let's continue.

■

in the interests of xxxxxx??

■

i'll answer this in such a way as 2 [hopefully] curb flame potentials....i perceive that the interests of every participant in email communities [including xxxx] r at stake here...larger issues such as power stratification + control-assertion thru discourse dominance, censorship + m.plied silencing of

positions that lie outside acceptable mainstreamic treatments are only *some*

of the crucial areas that may be n.voked by raising this on other lists...questions relating 2 communication diversification + acknowledgement of

minority perspectives + seeking 2 hi _light power perspectives that often deliberately mask agendas is also relevant in terms of offering + maintaining a

forum in which a community _based arena is prevalent....

■

why do you think you're getting no reply...?

xxcxxx, i have had replies from nettime, but am loathe 2 go in2 them here 4 the very fact that they r highly negative + ratify hierarchical power issues that currently plague the list. if you'd like me to post some of them in context, i'd be more than prepared 2 do so.

also, the nettime moderators have made it clear through x.tensive moderator intervention that the list [+ the intention of the list] has morphed markedly from its initial manifestation....it originally n.couraged collaborative net.art efforts [see the 95 archives] but now has shifted itself 2wards a vehicle that offers rationalist perspectives only...its similar 2 the right-wing global shift in co-opting + gloss-covering any media/dialogue that display experimental presentations or adheres to "other" discourse metho[ology]ds...i find this type of morphing very questionable in terms of nettime's stated sig file aim:

" is a moderated mailing list for net criticism, collaborative text filtering and cultural politics of the nets"

..obviously the latent nettime agenda nowadays seems biased 2wards a stilling approach, whereby any non-regular opinions [ie that that don't fit the typical reply/response/debate/argument syndrome that heavily institutionalised mailing lists labour under] r excluded. this x.clusion is also n.forced sporadically||whimsically + seemingly in accordance with moderators personal perspective + opinions [i c it as deliberate bias 2wards/against certain subscriber postings + again, can give a multitude of egs if u wish?].

4 those of us who initially n.joyed the benefits of this open-ended approach 2 info-presentation on the nettime list [+ who helped 2 actively shape the nettime list ethos + the net.art genre itself] it is extremely sad 2 witness the n.trenched mono-forcing of multilogues in2 such exacting expressions + deliberate censorship of anything that the list both n.couraged + celebrated previously [+ n.deed, on which it constructed its reputation].

in seeking 2 hi-lite this situation [via suggesting alan post this 2 several

lists] my intention was 2 n.courage an open-ended discussion of nettimes stated goals, either 2wards its original aims or even a partial reinstatement of them via list practice *or* offer a potential info-source + example via which other mailing lists may learn + possibly avoid the same entrenched [+ perhaps unconscious] bias formations.

■
[

]
■

.....n.teresting that u perceive alan's post as criticism + not as a potential 4 discussion of the issues i've raised above, xxxcxss. also, I'd really like 2 drawn u out here on ur "or something else" assertion...obviously u have an opinion on this, and i'd b more than interesting in reading [+ reacting 2] it, especially in light of how u see this opinion as contributing 2 the dynamism of the xxxxx list overall?

■Good comments Mez,

thx.

■After reading that mouth wash of a press release from ozco (see below),

■I am totally depressed at the sudden and surprising rearrangement there.

■Any one can read through that non speak.

sure, and it's interesting in terms of the pr gloss stylistics if 4 nothing else....

■Now with their new look and feel, I can see the last

■remaining pro's have been overwhelmed...

i think it's quite easy to get down about this...i had a recent exchange on the wryting list re: the globalised version of conservative trends during which i said this:

...since the heavy-conservative global creepage has set in in earnest, i've found myself oscillating between anger and more calming x.pressions as well....and also contemplating withdrawal from opinionated public x.pressions...as yet i've just opted 4 minimal responses instead....

...my responses r 2 seek flow without overt complacency + resolution [both personally + morally] 2 issues that effect me + thus prevent sliding in2 a.path[y]....

i think this is probably my way of dealing with johnny h's fallout in many areas....

...in terms of funding i'm quite lucky in terms of having a few substantial commissions thrown my way due to my rep overseas, especially in european countries.... the last [in the k \$] funding i received from oz [besides smaller commissioned works] was from the new media board about 3 yrs ago? in the "established" artworld|scene in oz i'm considered a weird psychotic hybrid-theoretician-artist, so they don't really pay me much attn:)

;)

Reply-To: webartery@yahoogroups.com
Subject: [webartery] Re: the easy ones
To: webartery@yahoogroups.com

Dear mez,

To see your lines in our time must be what it was like to hear Praxilla at an Olympiad. They pour life. So few fragments of her honest*sharp*down*and*dirty*lovely*s*t*a*r*y*lines exists

(maybe 6 lines? she was accused of being a non poet because she sort of compared Apollo to a banana and pears that are ripe and many Greeks could not see how gods and fruits could be similar)

that whenever I see your lines I see Praxillaheartmindlight pouring out again. I think she must have fallen down through the earth for 2500 years and popped up in Australia.

Give your dogs a hug from me.

Your Friend,

David

PS The trouble with most people is they gush out what they see everyone else gush out and not their unique authentic individuality of humanlight.

3.2.6 _trad sense_ (2005-02-16 00:47)

<> ..thats if u subscribe to the traditional aspects of blogdom. not every1 uses blogs in that way.

<> if its a diary in the trad sense u described above, i agree. but if its a manipulation of form and corresponding content, i don't agree.

<> interesting tho that ur stance echos ppls inability to deal with emotions as expressed online, especially spiking affectivity [trolls, flame actions, personal expressions, etc]

<> it could yes, but in part that could also indicate a lack of wanting to deal with others emotional output in a avenue that could perceived as being designed for a more codified, clinical approach to interaction?

<> y do u think emotional expression with "real" [i'm guessing u

mean physically present]people is more valid than emotional connections shared/explored/made online?

<> i am for "real"...really interested in terms of how u break down/compare/contrast the two?

<> so if a person was to [through reorienting perceptions or biochemistry-based/physical reactions] find an equivalent of expression, tone, inflections, body language, then u'd agree that the experience would be as significant as in real-life? note that i'm not asking u if u could, but whether its possible for others that may not be as mono-oriented in terms of physical presence requirements?

<> wot i'm asking is if u think that a person [probably not u, given ur stated opinions] mite be able to experience an equivalent set of experiences or connections via projected spaces?

<> i'm trying to pose a question that allows for grey areas, as i'm much more interested in them than trotting out stereotypical ego-power oriented answers, they just don't do it for me;)

<> ..this basically hinges on the notion of relative perception....that the way we parse the world is thru personalised perceptual bases, not stock-standard bio-chemical mimicry?

<> and y do we hold onto basica biological hangovers that allow for us to experience stressors normally constructed to assist us as a species [ie fight-or-flight, allostatic loadings?]

<> i'm posing an equivalency as a stimulus that allows for a similar affective loadings as would happen in real-time scenarios...ie not the same as in the physical reality component [stimulus-object-response] but similar in its ultimate effect [stimulus-perception-response?]

<> not sure if u read my bit above, but i really do like exploring ideas = concepts. in terms of a close-ended approach [ie being functional - finding a "point"] then i guess no?

<> again, i'm not up for ego-ratifying, point scoring, or proving my end of a discussion. i hate arguing, such a retrograde set of actions in my opinion.

<> well, technically its a satellite concept thats essentially floating around in the larger discussion theme of perception/emotion expression/validity +

experience?

<> for me thats really essentially a way to a dead/close-ended way of exploring...u'll shout "no but a fact is THIS!" and i'll say "but wot if its not? and wot about all of this information thats never ever been swished around the 2 base components of scientific validation, predictability and repeatability"?

<> so for me, i'll sit here and wait for some1 else to say something like "oooooH! so a fact really mite be this or mite be this? thats interesting!"

<> i love thinkers that are curious, that are all about opening up, not closing a conversation down thru proof and proving the other person wrong thru point gathering?

<> or, say, reducing complexity to flattened out concepts that hinge on cynicism and introspection?

<> its interesting when info _mation perspectives collide. here i am going "hello?! wanna come play with these amazing concepts sitting here? lets tumble them around for a bit" and ur sitting in ur closed in sandpit with boxed up sides saying " but i want definable truth! and boundaries! and reality based on precepts proven and rubber stamped by experts and that lead to facts!"

3.6.5 Fwd: Re: [-empyre-] bloggers [can] shrink systemic scarring (2005-06-19 08:20)

Date: Sat, 18 Jun 2005 21:43:28 +1000

To: empyre

From: " _s.v.m _"

Subject: Re: [-empyre-] bloggers [can] shrink systemic scarring

At 03:54 AM 18/06/2005, HW wrote lots of stuff, some of which i intend 2 respond 2, most of which i want to examine in terms of discourse variation + as an eg of how the potential of blogging can offer potential alternatives 2 argumentative/proof-based [mono]logging:

1. i wrote:

#blogs *can* [ad nauseam] present as less intrinsically reliant on fiscal or hierarchical reward-systems [ie such as newscasting/journalism] + projecting information outside of a framework formulated within these rigid economic dependencies [ie having the opportunity (with)in blogdom 2 present ur take thru an individualised opinion filter as opposed 2 a primarily monetary _inflected 1]. of course, the risks for those still even partially centred within a systemic reality should be acknowledged when Blogging _Against/Outside _The _Machine [eg being dooced <http://en.wikipedia.org/wiki/Dooce>].

2. HW responded:

First, I don't get the opposition:
from my perspective there is no
"outside the system".

this is the 1st instance of wot i perceive as a type of basic HW/mez _method of discourse _ variation. ie 4rm the get-go of ur reply, HM, it seems [+ i may be way off base here] as if u r intent on parsing my post as if it is intended argument + as such it follows a reasoned, logical [read: socratic/scientific/deductive-based reasoning/method based] structure. i didn't intend my post to b interpreted as such, which alone doesn't guarantee that it can't b, obviously. what i am basing my indicators-that-my-posting-indeed-may-not-intentional ly-b-argumentative-as-such r various language markers/signifiers that demarcate variations in the henry/mez streams of discourse:

-my discourse structure potentially could b perceived as being riddled with sound _bite-ish [though i tend 2 view it as succinct] philosophical/scientific blather, + unsubstantiated conjecture [according 2 established

rational mechanisms of validation/proof]. i prefer 2 labour under the delusion that it also displays ephemeral thinking/questioning, unfolding conceptual allure thru suggestion rather than instruction, abstract engagement + open inflection [lots of "can"/"may"/"seems"].

-ur [HW's] position seem 2 emerge quite strongly from a different orientation - preferring logical structures, deduction based on reasoning, examination of discourse elements through the use of introspection/personal experience + statistics, + conclusive/instructive & potentially didactic statements 2 prove ur overarching position?

An eg from ur post:

"There is only The System, as there is only one world we live in: this one."

....now without [hopefully] turning this into Reasoning 101, i've posited the above in order 2 high-light 2 things:

1. the difficulties + delicious engagement possibilities of this basic communication/discourse variance. i myself find the lure of my ego voice fairly demanding - ie falling back in2 manifestations of argument + proof building; responding 2 each of ur logical assertions with a counterpoint, intellectually jousting within-deductive-parameters + deriving insight/[and possibly]insult from this. i actually started a response that did just this: countering basic flaws + indicating inference holes. then i went "woah - power structures any1? ego intervention, hello!?" so trashed it immediately. i'm quite likely [unfortunately] as a scientifically/intellectually trained boffin 2 respond in this very light: indeed, i do fall splat-bang in2 it occasionally [d'oh!]. wot i would rather attempt, tho, is the utilisation of modalities that somehow reflect the medium + encourage a type of openness, rather than reduce the multilogue [as this is a forum in which multilogging seems desirable] 2 parameters that seem [probably unconsciously] exclusionary?

i suspect my dislike of reasoning didactically may stem from a nagging suspicion that it could actually emulate + ultimately allow for [in a substantially incremental sense] the perpetuation of, as HM puts it, the "rapacious global industrialism which developed in concert with and as a method of survival for, the rapid expansion of human population in the 20th century".

ie, i view the way in which this type of discourse is constructed [via reasoned proof] as aping the very mechanisms that, in my view, act to maintain/perpetuate global levels of exclusion, hierarchy, discrimination + domination.

which brings me 2 my 2nd [equally rambling] point:

2. the position that blogging cannot reflect or assist in establishing cultural or societal change/variance seems [2 me] an illustration of hierarchy based on this reasoning dependency quagmire.... by posturing that action is the only realistic avenue of change ["concrete activities by people"], this seems 2 then deny or invalidate any other type of resistance, questioning, or practice that may not be as overt or discernable in nature.

in my holistic/rhizomatic/jigsaw formulation of wot can constitute a type of resistance 2 overarching ideologically-defined systems, a devotee's flickr pictures of movies stars mite indicate some time of action of their own - the ability, on the most micro-of lvls, 2 organise, activate, or initialise some type of learning/cogitation/motivation [in contrast 2 overt in-ur-face-quantifiable activist Stimulus-Object-Response type]....i'd much prefer 2 absorb the twittering cutsie output of a blogger who devotes their time 2 documenting their luv of kittens than cringe at ppl convinced that they cannot make a discernable difference unless they perform "concrete activities"...ie who may also feel compelled 2 display [thru polarisations/rhetoric such as "if your not with us ur against us"] an orientation advocating apathy + helpless due 2 binary oppositions trotted out by ppl intent on saving them from their capitalistic servitude via an internalised dominator mimicking....

[ack....can...feel....ego.....intervening....must.....stop...-
.....typing.....;)]

with anti-apathy-r[easoning l]ust,
mez
[s.vee.m]

(2011-03-29 03:11:56) from HW

Hi Mez! Interesting to look back on statements from "back then". As I've written to you in other media, when I first came across your work, I wasn't impressed. Since then, I have done a complete 180, and I have come to appreciate your work very much, and I use it in a specific lesson in online communications theory. (so, thanks!) I do tend to be a bit "serious" about some things, esp. at that time and esp. when I posted to empyre - but that's just my dreary nature. My position is still (largely) monistic - there is only the system, and there is nothing outside it (kind of like the universe), however: I have since come to the conclusion that it is not uniform and is prone to extremes in contrast and value. Your work is just such a contrast and value, and I have come to appreciate it very very much. So, our exchange from 2005 is interesting, but sorely dated - valuable as a record of what once was, but not indicative of what presently obtains, at least for me. Keep up the good work, kind regards, HW

3.7.6 _mo[u]rning_k_ (2005-07-12 06:46)

"morning k.

thx for the re:ply - it's appreciated. coupla things 1stly:

1. i wouldn't describe myself as a billy corgan [bc] or pumpkins "fan"....i do appreciate their music [+ ability + potentiality] + am mammothly interested in the trajectory of bc in both a public + private [psychological] sense, especially as he illustrates /perpetuates shifting notions of fame + the inevitable struggle between pursuing artistic goals within an integrity paradigm or with[in] the call of the self[-motivators]....but don't subscribe 2 fandom of any description...i c that fan worship in essence assists in creating ego-posturing that [altho somewot nec. in order to construct notions of consumer.desire/celebrity] manufactures a false sense of idolisation + a d-emphasis on the creative output itself [ie bc's/pumpkin's music]. the cult of the ego has never interested me much:) i _am _ going 2 c bc in concert when he makes his shuttling way to oz at the end of the month.

2. in regards 2 bc's "Pumpkin-baggagehinder[ing] any true musical development ? Or that his childhood traumas have (programmed?) his songwriting along certain paths (essentially downbeat/sad - see Adore)?" , i'm interested in bc's seeming self-referential/cathartic expressions thru his creativity....+ how this type of focusing may influence his creative orientation....i c a certain irony in the fact that his new album [which i find intriguing + full of potential electric frizzion] is titled "TheFutureEmbrace" but that bc's actions + perceptions seem heavily dependent on a constant purging/reiteration of his past emotional/behavioural states + how this effects his creative endeavours? being an entity that finds value in balance - progression, i'm curious as 2 wot bc mite produce if he was less concerned with sp reforming + more centered around a mediation of the intellect/emotion/nostalgia?

3.9.6 Our Future + _O[ne]Ur-Future_ (2005-09-18 11:07)

From: Alan Sondheim

Subject: Our Future

Comments: To: Cyb

To: WRYTING-L@LISTSERV.UTORONTO.CA

Our Future

In 1973 I taught "The Year 3000" at the Rhode Island School of Design.

Most of the predictions described for the year 2000 have already occurred.

Now for the modest future of thirty years hence:

All megafauna in the wild will be extinct. The population of the earth will be close to its carrying capacity. Disease will run rampant due to pollution. Global warming will bring about fast-forward environmental effects, including rising seas, increased desertification, and extremely violent hurricanes. The life-span of humans will begin a temporarily exponential decrease. The rich will live in highly defended enclaves. Fundamentalisms will be the order of the day, since belief alone commands. Terrorism will be increasing exponentially, since future paradise is all there is. Capitalism will be bankrupt as national currencies collapse and

world-wide depression sets in. The information explosion will continue on localized data-networks and stuttering global communication systems. The global communications infrastructure will have reached its carrying capacity as well. For the first time, information will begin to corrode, decay, as structures can no longer be protected against the world-wide environmental crisis. The smaller generalist flora and fauna will begin to dominate the earth. Great portions of the globe will be uninhabitable. The larger aquatic species will have gone extinct, and the oceans will be dominated by off-shore algal blooms. Most urban drinking water supplies will be polluted and rationed. Suburbs will be abandoned as gasoline becomes an almost inaccessible commodity. The planet will seethe with continuous war, no longer fought among nation-states, but among private militias, guerilla groups, and individual cowboys. Religions and extremisms will be intertwined. There will be heavily-defended holdouts in the North American mountains, and relatively isolated land masses such as New Zealand. Fluid urban structures will be composed of well-armed gangs dealing with the major currency of drugs and weaponry. At least a third of all births will result in deformed infants. Ozone depletion will be almost complete and skin cancers will be exponentially increasing. Most hospitals world-wide will have closed their doors to all but the extremely wealthy. Knowledge-structures will have broken down as specialization and increased mathematical difficulties result in the problematizing of any theoretical work at hand. Computers will have reached a plateau of speed, complexity, and miniaturization. They will not have achieved consciousness. Robotics and nanotechnologies will not be the order of the day - plagues will. Sports franchises will be local and heavily subsidized. The air will be almost unbreathable, and asthma / allergic reactions will be one of the primary causes of death. Most deaths however are the result of violence. Local police will perform rearguard holding actions at best. Highway systems will have fallen into disrepair as economies collapse. Air travel will be almost non-existent; space travel will have disappeared. The space station will be a rusted hulk, if it has not already plummeted to earth. Literacy will be on the decline. There will be a world-wide energy crisis. Child abuse will have become child use and child discard; a high percentage of children will be proffered for labor and sexual slavery, in return for food and goods. Informal economies and the barter system will characterize most local trade. Transnational trade will be at a minimum. The genetic revolution will result in new and uncontrollable pandemics as viruses and bacteria become increasingly resistant. Highly modifiable immune deficiency diseases will appear on an exponentially-increasing basis. The greatest percentage of murder victims, per capita per age level, will be the elderly. Despair will be transformed into religious salvation. More than twenty nuclear weapons, most of them small and poorly-constructed, will have been exploded in various urban areas. Most

of the countries of the world, such as they are, will have weapons programs which will absorb a large proportion of the gross national product. Political economy will be ad hoc. Political ideologies will be fragmentary and situational. Electrical grids will be hard-put to maintain even the most minimal of services. The arts will have reached the limits of extremity, with suicidal art movements in the fields of theater, performance, ballet, and installation. The new media 'movement' will have become a thing of the past. Art history will have disappeared as museums fall victim to gang warfare and destruction. Most national heritage monuments will have been at least partially destroyed. Most populations will be drugged...

Subject: Re: [syndicate] O[ne]Ur-Future
Sender: Sympa Owner

At 05:52 PM 17/09/2005, you wrote:

O[ne]Ur-Future

In 1970 I was being born _torn from "The Month July" by the Act of 2 Month Prematurity. Most of my predications r dictated by actions performed 5 years previous 2 the year 2000. As I reached my modest future of +thirty years, I suspect:

All megaliteracy will be wildly experimental. The pop _culture of the earth will be closed 2 its capitalistic capacity. Discourse will run rampant due to peer2peer. Local issue warming will bring about close-knit environmental effects, including harnessing seas [wave-energy], increased domiciliation, and extremely overt nodal _interactions will result. The life-span of humans will meld with ecological equilibriums. The rich life will derive from highly connected encounters. Affective _harmonics will be the order of the day, since balance

alone conjoins. NoNeedForIsms will be increasing exponentially, since here+now paradigms r all there is considered is. Connections will be harnessed as national currencies.

Information will implode into open _source _packets in data-networks + fluttering linked communication systems. The communication lifestyle will have reached its capacity for limitation. For the first time, information will begin to embed, dissolve, as structures can no longer be touted as world-wide comprehension compressors. Generated flora + fauna will begin 2 help disseminate new theories that dissolve neo _darwin mutation/evolution perspectives. Great portions of specific genepools will remain unmapped. The larger academic species will have been made extinct, and the offices will be decimated by on-line educational mobile blooms. Most urban professionals will be considered competitively polluted. Rigid nationstates will

be abandoned as gasoline becomes unnecessary. The planet will stretch in continuous poise, no longer burning with greenhouse toxicity, but within sustainability-states. Religions + extremisms will be obsolete. There will be open community segments in the nodality areas + relatively isolated man masses. Fluid nodal points will be working functionally, full of well-integrated groups dealing within a major methodology of Here+Now. At least a third of today's births will be considered excessive. Oligarchic depletion will be almost complete and social competition will be decreasing. Most homes world-wide will have opened their doors to all but the extremely dysfunctional individualised who cling 2 non-nodal orientations.

Knowledge _structures will have broken down as data _sets + increased information interpretations result in burgeoning complexities. Computers will

have progressed towards seed _replication, mobile _function + hybridisation. They will

have achieved a type of fledging consciousness. Artificial Informatics and neural _nodepointologies will be the order of the day.

Collective culture franchises will be local and heavily subsidized. Free will will be considered unbreakable + all fascist reactions will no longer be one of the primary causes of death. Local interactors will perform life-saving actions

only with individual authorisation at best. Highway systems will be obsolete as

1st-world obesity is eradicated via a meme emphasis on the physical. Air travel

will be almost non-existent; nodal interaction will be considered sufficient. The

space station will be a relic dedicated to the era of the economic excess.

Nodal _Literacy will be encouraged as a world-wide [open] source.

Animal abuse will have altered with animal comprehension + the equivalent

respect loadings implemented; a high percentage of animals will be offered symbiotic partnerships in tandem with the removal of factory farming + socioeconomic constructions of necessary flesh consumption. Informal permacultures + the barter system will characterize most nodal trade. The genetic revolution will not result...

Game Emulation Therapy

1. Identify client's empathy loadings within the construct.
2. Establish avatar-projection capabilities via recognition of lead _character validity. Encourage verbalisation of 1st-personalities as opposed to 3rd-personality constructions.
4. Assess integration of named game-character attributes and environmental projection into geophysical parameters.
5. Identify primary needs met via named character[s].
6. Chart the goal-based progression in terms of abilities, spells, casting, melee, range, + non-combative skills [guild joining, reinforcement of random altruism, etc].
7. Draw comparisons with short vs long term goal setting; benefits of cohesive play in adaption situations.

.....[tossing + turning last nite i was p(art)ondering the notion of happiness + how prevalent this concept is as a core element in most of the ways we structure/orient our actions....it seems such a highly n.dividuated trajectory in terms of a potential _positioning..... the idea that an individual need/want 2 full _fill overt happiness categorisations could produce hedonism output or x.istential wrapping in order 2 justify questionable/self(oriented)ish behaviour]...

...[was considering how i have at.tempted 2 alter my formulation of happiness 2 b more x.clusive than n.clusive + 2 place it within a systematic, connected framewurk revolving around my belief variables (n.cluding positive/creative/x.pressive energy x.penditure + mental conservation in regards 2 other time.draining.n.fluences as well as a deep n.tegrative/ec {method }ological approach 2 everyday micro _decisions + their potential 2 chain/string _effect other less definable/quantitative states/manifestations of reality]....

..[this, obviously, has profound ramifications in terms of how i achieve a sense of balance _sans _rigidity + n.corporation of n.terjections of chaotic variables + necessary adaptation/growth]....

terso (2006-05-03 15:55:46) On happiness

It is easy to look to one's self when it comes to happiness. Indeed, there's nothing wrong in that. However, in my view, our world is vast and populated. We share our experience[s] with countless others. We have the ability to contribute to a global community. I believe education, art and technology are the key. I get fulfillment in helping others, and i plan to dedicate the rest of my life to that. That's my .02 and who am I? Thanks for sharing.

4.8.1 Re: re (2006-08-02 06:46)

[attempts.2.unf(bl)o[ssom]ld.another.disc.u ssion].....

it is n.teresting watching the rants + logs + zipperings +
ova.ton[aliti]es of the mashedup+ova”is net.art dead”
[velvet+satin.potentiality.n.furred] thread.....
—

.....a few [in]part.ially _related tendrils unfurled 4rm my
neck.of.the.proverbial.w.o[od]ulds:

post _hocian judgements + argumentative[ie ”discussion”] structuring
breeds tandem|piggybacked|opinionated posturing. reflection +
m.ulation allow 4 the very same.

stoic pro[gr]fessions regarding the validity of the linear + any
subsequent masquerading of artistic.output diluted as
valuable.only.via.pr[hist]o[r]xy]sperity’s.fi ckle.judgement does
not.the.truth.make [+ i don’t kno wot _the truth _ is...the
unfinished/unquantifiable holds far more value (purr.sonal.ly) than
concrete, pre.pack(et)ed, right-wrong validations].

labels operate as a bench[big.black.crayon]markers of the known. the
more we m.ploy them [aka as
art/culture/mem.etic(k-toc).agents.in.woteva.guis e.u.care.2.mention]
the more cryst[form]ali[z]ed]ne they b.come.

i'm currently constructing within the potential of the un[or
 as.yet]known: i have no idea wot my ARG/wiki/faux.infomorph merge
 currently _is _ or wot it w[on't]ill b.come. this is the x.citing part
 - the id[n]e[us]a; the fusing of concept +
 [mixed.up.cruci(fied)bled]form. hopefully those i'll n.vite along 4
 the x.pressive.ride will be just as n.thused. if _how.eva _ nothing is
 made concrete as observable, label _ish out.put, is my "project" a
 failure? does it retain a[ny]rtistic value/merit?

5.1.3 _Memory_Podd Inc_ (2007-01-13 09:42)

MemoryPodd BETA software [MEMEPODD] creates a user-defined reality version of memory construct files (*.podd) in avatar _compatible models (Tars). Later versions of MEMEPODD are expected to have different reality _layer _field _encoding with AI geared towards autonomy rather re-creation. convertoutpodd is a command line utility to convert *.podd files created

with MEMEPODD to TAR manifestations that correspond exactly with a users desired model.

Before uploading the *.podd files, they must be converted to the TAR manifestation format, otherwise your model will operate in a recursion loop [ie non-synergistic and low-reality user response levels].

—

Welcome To Memory _Podd!

Ever felt like your lost true love would always come home? Missing your departed Dad or Mom? Want to have Buster, the dog you had when you were 13, come play fetch again?

Well, you're in the right place!

Memory _Podd allows clients to recreate past relationships with significant others all through realistic state-of-the-art interactive modelling. We strive to bridge reality gaps that allowed people (or animals) from your past to slip out of your life. How do we do this? Through the creation of a permanent remembered version of your Tar (your chosen significant other) through modelling a real-time entity with which you can play, talk, hold and love!

5.1.5 (2007-01-19 15:54)

On 1/18/07, Melinda Rackham wrote:

■
Hi all
■

hi mel + all.

■
The basic polemic annoys me.. we cant operate today without speaking the language of economics. Culture and commerce do go hand in hand. Are we trying to dive an educative wedge into this ? I don think that's in any way a reality.
■

i suspect those m.mersed in the _production _ [as opposed 2 the codification] of culture cogitate less about their place in the [socio]economic stratosphere + more about the manif[r]e[ali]s[a]tation of their ideals+concepts. the notion of b.ing unavoidably mired in a "language of economics" seems tied 2 a framework driven by certain processes that seek 2 n.stitutionalise these n.deavours via a formal[recogn]ised/parcelled 'cultural' product/stream [i'm seeking clarification on ur use of the term "we" here?]

....."we" [as in certain n.divi _duals that /loc.ate themselves (either geospacially or perceptually) elsewhere from a heavily westernised conception of reality that d.fines worth thru capitalistic n.dicators/m.mersion] can function quite fine [thk _u!] in a reality that may b quantitatively different 4rm urs - does this then make it invalid according 2 how u box ur definition of reality?

i find certain modes of cu[ltural]rrency veering strongly _away _ 4rm this top-down/ratified-via-precedent/sanctioned approach x.tremely n.teresting...@ present i'm x.ploring/researching/plotting a faux soc _network project [_feralC] that cs this formalisation as clinging within stratified fibres n.dicative of a close-ended/linear approach 2 weaving acculturation:

"The academy ... is today so swamped by the assumptions and practices of market economics that it is deeply implausible for academics to tell their students they inhabit a postmodern world where a multiplicity of ideologies, world-views and voices can be heard. Their every step hounded by market economics, academics cannot preach multiplicity when their lives are dominated by what amounts in practice to consumer fanaticism. The world has narrowed intellectually, not broadened, in the last ten years. Where Lyotard saw the eclipse of Grand Narratives, pseudo-modernism sees the ideology of globalised market economics raised to the level of the sole and over-powering regulator of all social activity – monopolistic, all-engulfing, all-explaining, all-structuring, as every academic must disagreeably recognise. Pseudo-modernism is of course consumerist and conformist, a matter of moving around the world as it is given or sold."

- Alan Kirby

■
Of necessity cultural producers embrace the language of policy and the languages of spin.

■
they do? in order 2 have them con[de]fined + validated with a rubber stamped acceptable sign [ie make it in2 the inner-sanctioned-power-definer's eye _path] i agree....but 4 those not oriented within the "reality" [my definition of reality is more a heavily _variable faceted patterning] of becoming culturally relevant or mass marketed along a e[ducative]conomic axis, i'd beg 2 diffa.....

■
This is basic survival in producing sustainable "education" and by that i mean cultural events, spaces for dialogue, skills development, introducing new concepts to new audiences.

■
....again, according only 2 those status _quo channels geared 2wards the event/xhibition/object/"the pitch" as defining how cultural landscapes lie....fomenting abstractions currently perceive "education" [as defined thru these means] as essentially perpetuating a dynamic molded within expressive confines out-of-step with the n.credible rewriting of hub _networking or flattening of the creator/absorber/audience [think:myspace, blogging, live-

leaking]....in the potentiate infoclimat of social nets redefining m[eme]odes
2wards anything _but _ the sustainable, of rewriting the market/canon from
the inside via a removal of the x.clusivity of function according 2 n _dividual
creator labels [such as an artist, definer, teacher] education as such ceases 2
b....

[troll _bait snipping here]

■

Dirk wrote that Second Life is harnessing all the creativity out there.. Is
that wrong? I used to be highly critical of it, but have changed my mind.

■

i'd b really n.terested 2 c wot in fact changed ur position here mel - if
it was the gradual seeping of Second Life as an acceptable platform for
corporations/'educators'/other m[eme]ainstream _signifiers?

■

It Performs a fabulous educational and social role in our society. Art
organisations are falling over themselves to have galleries exhibitions and
residencies there - be part of the culture you've got.

■

bzzzT: i say:m.plode.the.cult[ural].trend

5.3.3 _competition m.[d]body_ment_ (2007-03-09 17:26)

competition m.bodies the myth of freedom;
-u r free 2 operate in an open market
-u r free via demo.crazy
.free 2 b smarter than ur neighbours
.free 2 b as sarcastic + pseudo-liberal as u like
.free 2 offer versions as fact
.free 2 present jib[e]s as n.teraction

#u r not free.
#u r not non-controlled.
#u r indoctrinated like the rest of us.

u r:
controlled enuff 2 b cultu[vi]r[tu]ally myopic
controlled enuff 2 denigrate x.periential leanings
controlled enuff 2 consider argument as tool
controlled in2 viewing socratic method = free-form
controlled enuff 2 perceive justifications as truth
controlled enuff 2 state ur opinion as fact
controlled enuff 2 offer hidden abuse as humor
controlled enuff 2 consider history = static
controlled enuff 2 subliminally feel urs is the right>only>valid way
controlled enuff 2 assume a sense of beauty is universal
controlled enuff 2 spout point scoring as x.change
controlled enuff 2 declare arrogance = openness

(2007-03-25 00:56:43) b

Chapter 8

2010

8.1 January

8.1.1 `_modern:body::forces_` (2010-01-29 08:08)

Part 1: `_Body_(c)Hunking_`

"...four-dimensional `[4D]at[a]mospheric Body_(c)Hunks` depict the standard modern `_body [redNet-merge-blueNet-merge-greenSoc]` M-print. Current `(c)Hunk` construction proceeds as follows:

1. `StRipp[[]]ing of Intimacy:`

This type of 4D Biorippling ensures the tracking, trickling and eventual flattening of preemptive desire nodes. Biorappelling then removes all normative `[hor]Monal` traces and leave the entity `[com]Punction-free`.

2. Introduction of Intricacy:

Stripping intimacy quotients removes the problem of `-X[un]tended Affective [de]Formation`. The introduction of `[re]Placeable _Intricacy` assures the conversion of `[phero]Monal` trajectories to `[vec]Tor[n]Space _[di]Stancing` in a sequence of required attitudes defined as functions of `S[t]ex[t]ing`.

3. Soft `_S[t]ex[t]ing:`

System dynamics are then separated into the `BioDepth[charged]` + `Cog[knit]Dependent`. The `CogKnitters` are independently controlled and employ `4[D]` performative `[de]functions...."`

Pure: stop.
Attack: stop.

Dear Mr Miss>Misogynist,
Baby-Caking>Cackling and Victim(timorous>sham)Making: and
Idol-lying>lysing and Bawling>Brawling: equals
Your fear is slip-shod-wingless>showing.

Attack and attention "me"meing is no defense>(you coward!)
Nor is it eloquent(>TNTish)>elegant>or coquettish.

In short: you stink of the abortive>anti-drink.

You convince your salted>alternative(shelved)self which lurks in
Your crippled conned>cave
Of soul(lanced)+sanctity, of titty-lessness.
You slip + feminine sheep>sheen
All divine + pacifist>fisting, while
Compounded>passion *is not yours*.

Sea spines and serpents lurking in repressions swells:
RIPping>poiesis off and in:
Your voice is bald. Your senses
...not like Balder: and or but(t ugly).
